I urge you to reject the National Association of Broadcasters' petition 04-160, which calls for a ban on local traffic and weather from satellite radio services. I waited for years to get an option in the kind of radio I listen to, and I find it unfair that the NAB wants to reign in satellite services. It is especially unfair when you consider that cable TV systems are allowed to carry the Weather Channel, a nationally broadcast service providing locally oriented information. Thank you for your time.
